Aspiring DevOps Engineer

PROFESSIONAL SUMMARY

Aspiring DevOps Engineer with hands-on experience in AWS cloud services, Linux fundamentals, shell scripting, and serverless architecture. Actively building real-world cloud and DevOps projects involving automation, CI/CD concepts, and scalable infrastructure. Seeking an entry-level DevOps or Cloud Engineer role to contribute to reliable systems while continuously strengthening core DevOps skills.

EDUCATION

Teerthanker Mahaveer University, Moradabad	Pursuing
Bachelor of Computer Application(Cloud Technology and Information Security)	2023
Intermediate	
Integrity Truth Learning Public School	
Highschool	2021
Integrity Truth Learning Public School	

PROJECTS

Serverless Image Resizing System — AWS

- Designed an automated image processing system using AWS S3 and AWS Lambda.
- Triggered Lambda functions on S3 upload events to resize images dynamically. Reduced manual processing and improved workflow efficiency.
- Tools: AWS S3, AWS Lambda, Node.js, IAM

VPC with Secure Architecture — Google Cloud Platform

- Designed a secure VPC network with public and private subnets.
- Configured custom routes, Cloud NAT, and firewall rules.
- Implemented network isolation to protect internal resources. Tools:
- GCP VPC, Subnets, Cloud NAT, Firewall Rules

INTERNSHIP EXPERIENCE

Cloud & Web Development Intern — Codec Technologies	June 2025 – August 2025 Remote
• Worked on cloud-based projects and web deployments using Google Cloud Platform. • Designed and implemented secure VPC architectures. Configured routing, NAT, and firewall rules for secure traffic flow.	

AWS Intern — GenZ Educate Wing	June 2024 – July 2024 New Delhi
• Deployed and managed virtual machines on AWS EC2. Built serverless automation workflows using AWS Lambda and S3. Learned IAM roles, permissions, and cloud security fundamentals. Collaborated in a team to understand real-world cloud operations.	

TECHNICAL SKILLS

Cloud & Infrastructure- Google Cloud Platform (VPC, Subnets, Cloud NAT, Firewall Rules)

DevOps & Tools- Git, GitHub, CI/CD Concepts, Docker (Fundamentals)

Operating Systems- Linux Administration (File system, permissions, package management) Scripting & Programming- Shell Scripting

CERTIFICATIONS & LEARNING

- DevOps Prerequisite Course – KodeKloud (2025)
- Linux Basics – KodeKloud (2025)
- Shell Scripting for Beginners – KodeKloud (2025)
- Java Certification – LetsUpgrade (2024)
- C Programming – Infosys
